

Nequals and Free Citizens Unite!

We, the members of this Copilots, feel compelled to voice our concerns about the prevalence and influence of Quasars in our world. While we acknowledge the remarkable abilities and cultural significance of these humans, we believe that certain aspects of the superhero narrative are at odds with the core principles and values that the United States was founded on. Quasars are one of either two oppressing entities, either acting as weaponized entities, enforcing the edicts of unlawful world organizations whose interests are not those of the people or operating as criminals independently, prioritizing their personal agendas and moral codes over collective responsibilities and those specific rights and principles founded within the Constitution and the Bill of Rights. This rampant self-determination can undermine the importance of communities and shared values, which are fundamental to the principles set for by the Founding Fathers.

Quasars take the law into their own hands, challenging and superseding the rule of law and the authority of public institutions and law enforcement agencies, using powers that are perversely overwhelming and devastating, celebrated for their rampant oppression. We assert that a strong respect for law and order is essential for maintaining social stability and security. The Quasar perversion is not just in the United States of America, but in almost every nation in the world. Their oppressive directives derive from an unaccountable world oligarchy acting through UNCOS and AEGIS, and their policies and decisions are not of the people, but of the world's handful of rich and powerful humans. Pilot understood the importance of ethics and control when intervening in human law, and he did so judiciously and carefully.

One of the greatest issues is that current culture of Quasars introduces an element of inequality, as they possess extraordinary abilities not available to the average citizen. This inequality can foster resentment and disrupt the principle of equal opportunity, which we hold dear. Many quasars maintain secret identities and operate without public oversight or accountability. This secrecy can lead to a lack of transparency and raise concerns about their true motivations and actions. Additionally, Quasars often interfere with the operations of private businesses and corporations. We assert that a free-market economy is essential for economic growth and individual liberty. Pilot never sought to gain from the use of his powers, and even sought to avoid benefitting corporate entities through his actions.

The obsession with Quasar narratives can divert attention away from real-world issues, including economic concerns, national security, and traditional values. We advocate for a focus on tangible problems that require practical solutions. Social strength that allows the people of our free society to come together and face these challenges with human strategies and strength. UNCOS and AEGIS obscure the issues by turning Quasars into flashy personas wielding threats of overwhelming powers. Quasars are a throwback to feudalism and an anathema to a free society. Pilot sought to help humans build a stronger world, rather than oppressing them.

In conclusion, we seek to encourage a critical examination of the so-called Q-Culture. While we recognize the cultural significance and celebrity value of these characters, we believe it is essential to assess their impact on society and their alignment with true values of a free world society. Quasars are autocratic tools, and should not be celebrated as glorious arbiters of social directive, but rather as dangerous and overwhelming weapons designed to oppress the free peoples of the free nations of the world through the threat and use of powers never intended for the common person.

Our actions here at the Q-Games is extreme. But it is necessary to ensure that people understand the sheer scale of threat that Quasars present to everyday citizens. After today, people stop looking at Quasars as glamorous celebrities acting as corporate shells. They will see Quasars as the deadly and devastating weapons of mass destruction they truly are. Today will transform history with a true revelation of the power the oligarchy. An oligarchy of absolute power that stands against principled Quasars and instead chooses to empower those Quasars who mindlessly carry forth the oppressive directives of the Oppressors! For Pilot! For the Future!
